Replication package for "Perceptions about Monetary Policy"
Michael Bauer, Carolin Pflueger, Adi Sunderam

This replication package contains the data and code used to produce all tables and figures in the paper "Perceptions about Monetary Policy" by Bauer, Pflueger, and Sunderam, published in the *Quarterly Journal of Economics*.

Data and intermediate output

Data files, subfolder data:

File	Description
bcff_raw_May23.RData*	Raw data for individual BCFF forecasts
bc_May23.RData bc_May23.dta	Cleaned BCFF forecasts with output gap projections (R and Stata formats). *These files are produced by* `R/process_bluechip.R`
CPIAUCSL.csv	CPI from FRED
alfred/GDPC1.txt	Real-time GDP from ALFRED
alfred/GDPC1_UNITS.txt	Units of real-time GDP
alfred/GDPPOT.txt	Real-time CBO projections of potential GDP
alfred/GDPPOT_UNITS.txt	Units of potential GDP projections
FEDFUNDS.csv	Monthly fed funds rate from FRED
output_gap.csv	Output gap from FRED
UNRATE.csv	Unemployment rate from FRED
feds200628.csv	Yields from Gürkaynak, Sack, Wright (2007)
feds200805.csv	TIPS yields from Gürkaynak, Sack, Wright (2010)
USRECM.csv	NBER recession dummy from FRED
VIXCLS_monthly.csv	monthly VIX from FRED (starts in 1990)
VXOCLS_monthly.csv	monthly VXO from FRED (1986-2021)
fomc_bauer_swanson.xlsx	monetary policy surprises from Bauer and Swanson (2023)
ff futures updated.xlsx*	fed funds futures rates from Bloomberg
macro_news_updated.xlsx*	macro data surprises from MMS/Bloomberg
vwretd_daily.dta*	CRSP value-weighted return including dividends
SEP.xlsx	individual projections of FOMC meeting participants

* Because of the data licensing, the highlighted data files above are not included in the replication package. Sample data is included in files with names ending in SAMPLE.

Files with intermediate output, subfolder output:

File	Description
bluechip_rule_regressions.csv bluechip_rule_regressions.RData	OLS and FE estimates of simple policy rule
bluechip_rule_inertial.csv bluechip_rule_inertial.RData	Estimates of inertial policy rule
actual_rule_simple.csv actual_rule_simple.RData	Rolling-window estimates of simple rule
actual_rule_inertial.csv actual_rule_inertial.RData	Rolling-window estimates of inertial rule
ssm_ols.RData	Estimates of state-space model, OLS specification

`ssm_fe.RData`	Estimates of state-space model, FE specification
`gamma_ew.dta`	Equal-weighted gamma-hat estimates, estimated forecaster-by-forecaster
`gamma_bias_adjusted.dta`	Bias-adjusted estimates of perceived policy rule
`coeffs_id_ym_interact.dta`	Estimates of gamma with interaction between forecaster FE and output gap/inflation
`gamma_tercile1.dta` `gamma_tercile2.dta` `gamma_tercile3.dta`	Estimation of gamma for different terciles of forecasters by inflation forecast

Setup, Data Processing and Estimation

Directories

- R code should be run with the root folder as the working directory
- Stata code is run from `Stata` folder

Installation of R packages

Code file `R/setup.R` installs all the packages required for running the R code.

Processing Blue Chip Financial Forecasts

- Code file: `R/process_bluechip.R`
- Required data files:
  - `data/bcff_raw_May23.RData`
  - `data/CPIAUCSL.csv`
  - `data/alfred/GDPC1.txt`
  - `data/alfred/GDPC1_UNITS.txt`
  - `data/alfred/GDPPOT.txt`
  - `data/alfred/GDPPOT_UNITS.txt`
- Output:
  - `data/bc_May23.RData`
  - `data/bc_May23.dta`

Estimation of simple policy rule

- Code file: `R/bluechip_rules_regressions.R`
- Requires: `data/bc_May23.RData`
- Output:
  - `output/bluechip_rule_regressions.csv`
  - `output/bluechip_rule_regressions.RData`

Estimation of inertial policy rule

- Code file: `R/bluechip_rules_inertial.R`
- Requires:
  - `data/bc_May23.RData`
  - `data/FEDFUNDS.csv`
- Output:
  - `output/bluechip_rule_inertial.csv`

- output/bluechip_rule_inertial.RData

Estimation of actual/historical simple and inertial policy rules

- Code files:
    - R/actual_rule.R
    - R/actual_rule_inertial.R
- Requires:
    - data/FEDFUNDS.csv
    - data/output_gap.csv
    - data/CPIAUCSL.csv
- Output:
    - output/actual_rule_simple.csv
    - output/actual_rule_simple.RData
    - output/actual_rule_inertial.csv
    - output/actual_rule_inertial.RData
    - correlation between actual and perceived (pre-ZLB: 0.5, p.12)

Estimation of state-space models

- Code files: R/ssm_ols.R and R/ssm_fe.R
- Requires:
    - data/bc_May23.RData
- Output:
    - output/ssm_ols.RData
    - output/ssm_fe.RData

Estimation of coefficients equal-weighting forecasters

- Code file: Stata/gamma_ew.do
- Requires:
    - data/bc_May23.dta
    - output/bluechip_rule_regressions.csv
    - output/bluechip_rule_inertial.csv
- Output: output/gamma_ew.dta

Estimation that accounts for heterogeneity

- Estimation of gamma for different terciles of forecasters by inflation forecast, and gamma with interaction between forecaster FE and output gap/inflation
- Code file: Stata/heterogeneity_FE_terciles.do
- Requires:
    - data/bc_May23.dta
- Output:
    - output/coeffs_id_ym_interact.dta
    - output/gamma_tercile1.dta
    - output/gamma_tercile2.dta
    - output/gamma_tercile3.dta

Bias-adjusted estimates of perceived policy rule

- Code file: `Stata/bias_v4.do`
- Requires:
    - `data/bc_May23.dta`
    - `output/bluechip_rule_regressions.csv`
- Output:
    - `output/gamma_bias_adjusted.dta`

Estimation of perceived policy rule with credit spreads

- Code file: `R/bluechip_rules_creditspreads.R`
- Requires: `data/bc_May23.dta`
- Output: prints correlation of gamma estimates (reported in Section 6) to console

Figures and Tables

Figures 1 & 2, Appendix Figure B.1: perceived and actual policy rules

- Code file: `R/plot_parameters.R`
- Requires:
    - `output/bluechip_rule_regressions.RData`
    - `output/actual_rule_simple.RData`
    - `output/bluechip_rule_inertial.RData`
    - `output/actual_rule_inertial.RData`
    - `output/ssm_ols.RData`
    - `output/ssm_fe.RData`
- Output:
    - `figures/bluechip_rule_simple.pdf` - Figure 1 (without annotations)
    - `figures/bluechip_rule_inertial.pdf` - Figure 2 (without annotations)
    - `figures/ssm.pdf` - Appendix Figure B.1

Table 1: cyclical correlations of gamma-hat

- Code file: `R/gamma_cyclical.R`
- Requires:
    - `output/bluechip_rule_regressions.RData`
    - `output/bluechip_rule_inertial.RData`
    - `data/feds200628.csv`
    - `data/UNRATE.csv`
    - `data/USRECM.csv`
    - `data/VIXCLS_monthly.csv`
    - `data/VXOCLS_monthly.csv`
- Output: table printed to console

Figure 3 and Appendix Table D.1: response of gamma-hat to high-frequency monetary policy surprises

- Code file: `R/gamma_lp.R`
- Requires:

- `output/bluechip_rule_regressions.RData`
- `output/bluechip_rule_inertial.RData`
- `data/output_gap.csv`
- `data/fomc_bauer_swanson.xlsx`
- Output:
  - `figures/gamma_lp.pdf` – Figure 3
  - Appendix Table D.1 printed to console

Table 2: sensitivity of interest rates to macro news

- Code file: `Stata/macro_news_clean.do`
- Requires:
  - `output/bluechip_rule_regressions.csv`
  - `output/bluechip_rule_inertial.csv`
  - `data/feds200628.csv`
  - `data/ff futures updated.xlsx`
  - `data/macro_news_updated.xlsx`
- Output: Tables are saved as .tex files in folder `tables`
  - Table 2 (sensitivity to macro news): `macro_news_a.tex` (Panel A) and `macro_news_b.tex` (Panel B)

Table 3, Appendix Tables E.1, E.2, E.3, E.4, C.1: term premia and fed funds forecast error regressions

- Code file: `Stata/term_premia.do`
- Requires:
  - `output/bluechip_rule_regressions.csv`
  - `output/bluechip_rule_inertial.csv`
- Output: Tables are saved as .csv files in folder `tables`
  - Table 3 (term premia): `returns_surveys_gamma_ffe.csv` (Panel A) and `returns_surveys_gamma_inertia.csv` (Panel B)
  - Table E.1 (Predictability of excess bond returns): `returns_1yr_5yr_controls_gamma_ffe.csv` (Panel A), `returns_2yr_5yr_controls_gamma_ffe.csv` (Panel A), `returns_1yr_5yr_controls_gamma_inertia.csv` (Panel B), `returns_2yr_5yr_controls_gamma_inertia.csv` (Panel B)
  - Table E.2 (Correlation with interest rate disagreement): printed to console
  - Table E.3 (Term premia controlling for interest rate disagreement): `returns_surveys_9010_gamma_ffe.csv` (Panel A), `returns_surveys_9010_gamma_inertia.csv` (Panel B)
  - Table E.4 (Term premia onto components of perceived inertial rule): `returns_surveys_multi.csv`
  - Table C.1 (Predictability of fed funds forecast errors for the federal funds rate): `forecast_errors_gamma_ffe.csv` (Panel A) and `forecast_errors_gamma_inertia.csv` (Panel B)

Table 4

- Code file: `Stata/hs_clean.do`
- Requires:
    - `data/output_gap.csv`
    - `data/fomc_bauer_swanson.xlsx`
    - `data/feds200628.csv`
    - `data/feds200805.csv`
    - `data/macro_news_updated.xlsx`
- Output: Tables are saved as .tex files in folder `tables`
    - Table 4 (sensitivity of long-term rates to monetary policy surprises): `hs_a.tex` (Panel A) and `hs_b.tex` (Panel B)

Table 5

- Code file: `Stata/bk_clean.do`
- Requires:
    - `output/bluechip_rule_regressions.csv`
    - `output/bluechip_rule_inertial.csv`
    - `data/fomc_bauer_swanson.xlsx`
    - `data/vwretd_daily.dta`
- Output: Tables are saved as .tex files in folder `tables`
    - Table 5 (stock market responses to monetary policy surprises): `bk.tex`

Figure 4 (model-implied impulse responses)

- Code file: `Matlab/ModelIRF.m`
    - also uses: `Matlab/Simulate2.m` to simulate the model
- Output: `figures/gamma_IRF_rationality.png`

Appendix Figure A.1: term structure of disagreement

- Code file: `R/disagreement.R`
- Requires: `data/bc_May23.RData`
- Output: `figures/disagreement.pdf`

Appendix Figure B.4: Comparison with SPF

- Code file: `R/spf_rules.R`
- Requires: `data/SPFmicrodata.xlsx`
- Output: `figures/spf.pdf`

Appendix Figure B.5: Rules implied by FOMC economic projections

- Code file: `R/sep.R`
- Requires:
    - `data/SEP.xlsx`
    - `data/alfred/GDPC1.txt`
    - `data/alfred/GDPC1_UNITS.txt`
    - `data/alfred/GDPPOT.txt`

- data/alfred/GDPPOT_UNITS.txt
  - output/bluechip_rule_regressions.RData
- Output: figures/sep.pdf

Appendix Table A.1 (summary statistics)

- Code file: Stata/summary_stats.do
- Requires: data/bc_May23.dta
- Output: summary statistics printed to Stata console

Appendix Figures B.2 and B.3 (forecaster heterogeneity and bias-adjusted estimates)

- Code file: Stata/robustness_plots_correlations.do
- Requires:
  - data/bc_May23.dta
  - output/bluechip_rule_regressions.csv
  - output/bluechip_rule_inertial.csv
  - output/gamma_ew.dta
  - output/gamma_bias_adjusted.dta
  - output/coeffs_id_ym_interact.dta
  - output/gamma_tercile1.dta
  - output/gamma_tercile2.dta
  - output/gamma_tercile3.dta
- Output:
  - correlations with baseline gamma in tab correlations (mentioned in text in Section 6)
  - figures/AppendixFigureB2_PanelA.pdf
  - figures/AppendixFigureB2_PanelB.pdf
  - figures/AppendixFigureB3.pdf
